Final Assessment

For Reem Boudali, by Katie Campeau

Submitted Dec. 7, 2020.

Details

Summary of progress (Discuss concepts identified in the course, learning plan progress, skills)

Reem is passing at final evaluation. She has completed 80 clinical hours, missing one day and completed a shadow health assignment.

Reem was working on 5 north which is a medical floor that during the covid-19 pandemic was a rule out covid unit. She has met her learning plan goals this term that consisted head to toe assessment and increase knowledge of diabetes.

Reem is able to a practice therapeutic communication and documentations this in her 4 reflective journals and post conference. She is improving with her critical thinking skills and asked disease related questions on medication day she is able to understand pharmacology. She is starting to relate lab and diagnostics reports to the clinical presentation of her patients and able to answer critical thinking questions regarding disease processes. She is able to safely administer medications and follow the rights while critical thinking and answering questions regarding medications. Reem has administer PO, SQ, cream, ointment, eye drops. Her confidence and initiative in the clinical setting are also improving and she seeks learning opportunities. She contributions in post conference and collaborates during the virtual Microsoft teams. She is able to understand the Nursing Process during her assessment and is starting to identify diagnoses. Reem is doing a good job prioritizing patient diagnoses. She is able to demonstrate a head-to-toe assessments, dressing changes, patient boosting, transferring, ADL care.

Strengths (Things you did well consistently):

Reem is a very positive, energetic student who was eager to learn in the clinical setting. She has demonstrated team work and adaptability. During the pandemic working on the rule out floor the student assignments were changed often, Reem had no issues with the fast changes. Reem handed all assignments in on time and on the unit was able to complete her task in a timely manner. Reem has good time management skills and is meeting expectations at this level-yr 2 with 2 patients.

Areas for Improvement/Growth (Things you need to work on): Must be addressed in your learning plan for the next clinical experience

Reem needs to continue to focus on medical terminology, medical abbreviations, pharmacology, physiology, lab interpretation, reviewing diagnostic reports, critical thinking skills. Also understanding the nursing process to organize you patient care.
