

Faculty of Nursing CPE

Final Assessment

For Reem Boudali, by Josie Watson

Submitted May 21, 2021.

Details

Summary of progress (Discuss concepts identified in the course, learning plan progress, skills)

Reem has met the competencies for 2622 Consolidation (May-10, May19,2021)

Reem demonstrated excellence in the clinical setting, and displays confidence and leadership skills. Reem collaborated and communicated with professional team members and developed several professional and therapeutic relationships. The staff consistently remarked about the high level of care that Reem provided for pts. and the ease at which you communicated with the staff reporting pertinent information as needed. Reem consistently demonstrated strong critical thinking skills in the clinical setting in all pt care (head to toe assessments, documentation, interpretation of lab values and diagnostics), and used critical thinking and decision making to guide developing practice. Reem consistently maintained the safety and security of pt.s and others, followed hospital policy for hand hygiene and PPE use, ensured all equipment was cleaned following use, and maintained sterility during treatments and procedures.

Reem was able to effectively manage time by setting priorities and maintaining and organizing assessments, procedures, care. Reem is able to manage and care for 2 pts, as well as assist other peers, staff and pts. Reem consistently sought out new learning experiences and constantly challenged self to make your practice one of excellence. Reem continued to be a strong team member assisting others often and with ease.

Written work excellent, and able to identify nursing dx. and interventions. Reem has met the learning goals and is much more aware of the importance of transferring and repositioning of pts, and has developed excellent time management skills.

Clinical Skills: accucheck, v/s, HTT, proper donning and doffing of PPE, I/V discontinued, Cerner Millenium documentation and navigation of new system medication administration (po/sc/IV), post mortem care, turning and repositioning pts, toileting and assisting with feeding, ambulated pts.

Strengths (Things you did well consistently):

As at midterm, Reem continued to demonstrate accountability and professionalism attending clinical prepared and following dress code. Reem continued to demonstrate confidence and leadership in the clinical setting, seeking out new learning experiences through professional and therapeutic communication. Reem continued to provide compassionate care to pts., and questioned the pt condition in a critical way. Reem continued to be a leader among her peers. Great work, Reem.

Areas for Improvement/Growth (Things you need to work on): Must be addressed in your learning plan for the next clinical experience

As at midterm,
 Always remember to take care of YOU, practice body mechanics and raise the bed to your height so that you do not injure yourself.
 Continue to practice head to toe assessments on the summer break and in preparation for 3rd year
 Continue to use holistic assessment by putting the pieces together for the pt condition--consider any relevant lab work or dx that are needed/completed, why is the pt taking the medications they take?
 Continue to develop hand-offs which are important moments to communicate pertinent pt information for continuity of care, and in using the Cerner M. system
 Continue to review Sterile/ aseptic technique using CPE tools, textbooks, videos, and all available resources
 Continue to seek out opportunities to complete complex skills.
 Continue to use your lab kit to practice complex skills such as catheter insertions, complex dressings

The past year has presented many challenges for all of us, and I want to thank you for the hard work and passionate care given to your pts. at a time of flux and unknowns. You have shown courage at a time of uncertainty, and for that you deserve to be proud of what you have accomplished during this period. Take the time to appreciate all that you have contributed to ensure our population maintains health
