

Questioning Learning

Learning Outcomes

Too formulaic with how they are written

Restricts what's possible

Unpredictable is incredible

Everything is the same for each student. There is no diversity with online courses

All students will not end up at the same place

Make them big questions to be answered at the end of the semester

Online

Not fair to all students. Students with learning disabilities do not have the same opportunity to learn with these courses.

Teacher to only answer questions and grade work

Canned Courses

Not measurable

Understanding

Always on going. To understand something is going to reoccur often throughout your life.

Do not put in learning outcomes. Understand is a strong word that might make kids feel bad if they fail to understand something

Field trips outside of course content

Push back on these kinds of canned courses
