

Becoming the *TECHNOLOGIST*

let's overview,

as educators we need to integrate tech to support & enrich learning experiences

digital literacy, you ask?

staying safe online, while knowing how to navigate, create and communicate on the web

design thinking - tap into your toolkit!

empathize

identify the problem & start thinking about a solution

ideate

dig into your tool, share your results & refine your creation

connect

so to review

understand what users need can you overcome challenges with tech?

define

implement the solution, choose the ideal tech tool & make effective tech-savvy decisions

prototype

integrate tech into the curriculum & allow learners to thrive

let's show our students a new way to create in the classroom & give them tools to use their digital literacy skills
