## Details

**Summary of progress  
(Discuss concepts  
identified in the course,  
learning plan progress,  
skills)**

Reem is an exceptional nursing student who has met competences in all elements and exceeded expectations in the clinical setting. She starts each clinical shift with the most positive attitude and energy and shows kindness and compassion to all of her patients. She arrives early, prepared and ready to start the shift with all information completed in regards to caring for her assigned patients. She shows great passion in being in the nursing field and displays utmost confidence in herself. Reem is very knowledgeable and understands the complexity of her patient's diagnosis in relation to their clinical identity. She relates their medical history to their current problem list and thinks critically to create a picture of their current status. She confidently identify abnormal lab values and abnormal assessment findings. Reem displays very thorough and accurate information on her documentation with Cerner and is able to recognize normal versus abnormal findings and communicate them well.

Reem demonstrates safe medication administration. She is prepared to discuss the patient's medications in relation to the patient's diagnosis and lab findings as appropriate for the level of competency. She uses credible resources for researching medication information and accurately records medication administration and monitors, reports, and documents the patient's response to the medication. She provides appropriate patient education on medications and medication safety to the patient/family. She has progressed to providing complete care for 3 patients independently with minimal guidance, while assisting her assigned nurse with their other patient's personal care. She is timely and accurate with her charting, completing and charting her assessments with excellent time management. She maintains efficient throughout the day, charting her comfort rounds, intake and outputs and vital signs. She has demonstrated a variety of skills and is able to lead and instruct her peers displaying great leadership skills.

Reem is caring and empathetic and has received many compliments on her bedside manner. She has advanced throughout the semester in her assessment skills, communication skills and overall clinical knowledge. She is a resource for her peers as her clinical knowledge is noticeably advanced as she is a peer mentor at the University for the Nursing Program. Her understanding and confidence has been very noticeable in the clinical setting. She has received personal compliments from the nursing staff for her hard work, advanced knowledge and kind bedside manner. Keep up the amazing work!

**Strengths (Things you did well consistently):**

1. Leadership- Reem shows leadership qualities in our clinical group by having a great work ethic. She is noticeably hard-working by her peers and sets a precedence for the entire group. She is often found helping other students complete a task, assisting her assigned nurse with other patients, or keeping herself occupied by stocking gowns or emptying linens when her assigned work is completed.

2. Confidence- Reem displays confidence when performing assessments and skills on her patients, she makes them feel very comfortable. She is confident in asking questions when seeking more information. She uses critical thinking and challenges herself to increase her knowledge on a daily basis.

3. Time Management- Reem arrives early for all clinical shifts, is very prepared for each shift and completes all work timely. She works hard to complete everything in order to then use her extra time to seek further opportunities to learn.

**Areas for Improvement/Growth (Things you need to work on): Must be addressed in your learning plan for the next clinical experience**

1. Continue to practice relating clinical diagnoses with the treatment plan and challenge yourself in your critical thinking to relate medications and laboratory results to your patients medical condition.

2. Continue working towards your Learn Goals and seek practice with Tube Feedings in order to meet your upcoming goals for presentation on March 17th.

3. Continue to seek opportunities to practice your skills and enhance your clinical practical knowledge.
