

WINDSOR REGIONAL HOSPITAL
OUTSTANDING CARE – NO EXCEPTIONS!

Member of the Selection Committee:

It is my absolute pleasure to provide this letter of support on behalf of Reem Boudali. I do so with confidence and without reservation as she is beyond capable and competent for this position.

I had the pleasure of mentoring Reem as her Clinical Professor on the Clinical Teaching Unit at Windsor Regional Hospital for the duration of a 14 week term. It's very clear to me that Reem will be successful in this line of work. Reem stands out as one of the most kindhearted and knowledgeable student nurses that I have had the pleasure teaching. I could speak volumes of Reem's character as she demonstrated integrity and perseverance throughout the entire semester. She has an excellent bedside manner and provides her patients and their families with compassion. Reem communicates well with all members of the health care team, both verbally and non-verbally. She is able to handle full patient care assignments with ease, displaying great time management skills. Reem is exceptional at organizing and delegating tasks, proving that she is reliable and independent. Reem displays humility by being receptive to advice and feedback to ensure success.

Her work ethic and leadership skills added significant value to our team. Reem displays leadership qualities through her willingness to learn, her hard-work and positive attitude. Reem works for the University as a Peer Mentor for other students who require extra assistance and tutoring. Her knowledge and experience from this opportunity shows in the clinical setting as she is confident and proficient in her skills. She uses a high-level of critical thinking and is able to problem solve independently. She inspired and motivated her classmates by challenging herself and others to achieve greatness. Her persistence and hard work did not go unnoticed. It's these redeeming qualities that will make her an exceptional registered nurse at your hospital.

I have been an active staff in the Intensive Care Unit at Windsor Regional Hospital for the past four years with experience supervising students and interacting with many professionals at various levels. I am confident that Reem has all the attributes to be an outstanding addition to your health care team. She is professional, hard-working and has extreme devotion for service to humanity.

Overall, I have no hesitation in recommending Reem, as I wholeheartedly support her application to this position and believe any department will benefit significantly from having Reem as a member of their health care team.

Sincerely,

Jamie Osborn
Clinical Sessional Professor, University of Windsor
ICU RN Windsor Regional Hospital
