

## Faculty of Nursing CPE

# Midterm Assessment

For Reem Boudali, by Antoinette Dimitroff

Submitted Sept. 23, 2022.

---

## Details

### **Summary of progress (Discuss concepts identified in the course, learning plan progress, skills)**

Reem is working at the WECHU IDP for her community preceptorship. Reem started out with WECHU orientation and has been professional and on time for clinical and Teams meets. She is working on learning more about Diseases of Public Health Significance each shift. She has been investigating and following cases of monkeypox, as well as West Nile Virus. She has collaborated with her preceptor to support and counsel these individuals and Reem has started her own portfolio of cases to follow. Reem has been reviewing Ontario Public Health Standards: Infectious Disease Protocol, Clinical Connect, and UpToDate, Monkeypox Immunization Policy... She has learned about community supports such as Social work and government assistance programs and 211. She has been able to administer a vaccination for Monkeypox. She is meeting her LP goals.

**Strengths (Things you did well consistently):**

Critical thinking/Evidence based practice/knowledge application: for investigating cases of monkeypox and West Nile and understanding the need to educate and follow up with HCPs to ensure clear understanding and that they are following protocols for testing and treatment/follow up...Applies evidence from CDC, PHG...

Professional Practice: Conducts self in professional manner during conference and email communication, camera on for TL day. Active participation and shares ideas and knowledge at conference.

Assignments exemplary (LP). Journal 1 applies research re: monkeypox.

Communication and Collaboration: Has been team leader at conference 1 on Sept 16 and shared their community assessment with the group for the target population--Reem communicated clearly, engaged with the group and promoted active participation. All assignments on time, title page included, responds to emails quickly and checks BB for updates regularly. Shared in group discussion on Safe Injection Sites.

Safety and Quality: Proper PPE requirements followed. Aware of and reviewed safety policies associated with immunizations and follows PHIPA.

Medication Administration: Med quiz passed in 2 attempts.

Review/remediation documented in CET, participates in conference with med calculation questions. Continue weekly review. Safely administered monkeypox vaccine following WECHU policy.

**Areas for Improvement/Growth (Things you need to work on): Must be addressed in your learning plan for the next clinical experience**

Continue to work on learning plan goals and document progress in clinical hours log. Plan to continue to work with your group on IR case scenario and community care plan. Look for new opportunities to improve quality, safety, share research with preceptor and peers and implement evidence-based practice. Seek out opportunities to implement health teaching with staff, peers and clients/families.

Continue active participation in conference and sharing knowledge with others. You have shown leadership qualities and I encourage you to continue with this for Integrated Rounds.
